By Samuel Messenger Bradley

General Books, United States, 2009. Paperback. Book Condition: New. 229 x 152 mm. Language: N/A. Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Purchase of this book includes free trial access to where you can read more than a million books for free. This is an OCR edition with typos. Excerpt from book: CHAPTER VI. SUB-KINGDOM V MOLLUSC01DA. Molluscoida (mollis, soft; elSoc, like; resembling Mollusca). Definition, Aquatic animals, ?met with all over the world. The nervous system consists of a principal ganglion near the mouth, which is sometimes surrounded by a nervous collar. There is sometimes only one opening, which answers both for inlet and outlet. When there are two apertures, the outlet is situated close to the gullet or inlet. The gullet always conducts into a very large and widely expanded pharynx: the outlet, when present, conducts likewise into a large space, called the atrial chamber. The trunk is (with the exception of one group, the Appendicularia) surrounded by ciliated tentacles. They contain the following classes: 1. Ascidioida. 2. Brachiopoda. 3. Polyzoa. Ascidioida (ao-coc, a lag). Synonym, Tunicata. The Ascidioida are very singular-looking marine animals, resembling a double-necked little leather bottle at first sight. They frequently are grouped together in...
