## MEASUREMENT AND MULTIVARIATE ANALYSIS

Springer Apr 2014, 2014. Taschenbuch. Book Condition: Neu. 234x156x19 mm. This item is printed on demand - Print on Demand Titel. Neuware - Diversity is characteristic of the information age and also of statistics. To date, the social sciences have contributed greatly to the development of handling data under the rubric of measurement, while the statistical sciences have made phenomenal advances in theory and algorithms. Measurement and Multivariate Analysis promotes an effective interplay between those two realms of research-diversity with unity. The union and the intersection of those two areas of interest are reflected in the papers in this book, drawn from an international conference in Banff, Canada, with participants from 15 countries. In five major categories - scaling, structural analysis, statistical inference, algorithms, and data analysis - readers will find a rich variety of topics of current interest in the extended statistical community. 332 pp. Englisch.
